

## Special Issue

# Pandemic Tunnel Vision: Hidden Health, Social, and Economic Costs of the COVID-19 Public Health Response

### Message from the Guest Editor

Almost without exception the worldwide public health response to the novel coronavirus (SARS-CoV-2) and the resulting COVID-19 pandemic has focused exclusively on reducing morbidity and mortality from COVID-19, with relatively little attention paid to the accompanying costs of such a response. We anticipate submissions will include (but not be limited to) the following topics:

- Delays in cancer screenings/treatments
- Changes in access to standard care
- Educational impacts of school closures
- Mental health impacts among youth, including suicides
- Mental health impacts among older adults
- Nutritional/food insecurity impacts
- Changes in drug use/abuse
- Changes in domestic violence and/or adverse childhood experiences
- Health economics of widespread business closures and unemployment.

---

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
