

Special Issue

Pharmacy in the Frontlines of Public Health

Message from the Guest Editor

Pharmacy practice has traditionally been known to be synonymous with the dispensing function. However, as pharmacy profession continues to evolve and the scope of pharmacy practice expands, pharmacists have taken on several roles—providing a spectrum of prevention and treatment services to enhance population health outcomes beyond the dispensing of medications. The ease of accessibility of pharmacists to the public enables them to effectively contribute to public health efforts. This Special Issue aims to highlight the ways in which pharmacists are participating as public health practitioners—through research, case reports, commentaries, etc.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
