

## Special Issue

# Physical Activity and Public Health: Addressing Gaps in Research for Special Population Subgroups

### Message from the Guest Editors

Original submissions to be considered for publication in this Special Issue may address physical activity in international special population subgroups including (but not limited to) people living with chronic disease/conditions and/or disability, as well as underserved, under-resourced, economically disadvantaged, vulnerable and/or marginalized populations (e.g., poverty, uninsured, racial/ethnic groups, immigrants/migrants, religious groups, rural communities, etc.).

Research may address patterns or change in physical activity in special population subgroups, including the relationship of physical activity to chronic disease/disability or other health behaviors/outcomes, and/or barriers or facilitators for physical activity participation, among other themes and topics relating to physical activity and public health. Research can involve reviews, secondary data analyses, or original data collection with interventions, cross-sectional, observational, and longitudinal studies. We will also consider commentaries and concept papers. Studies utilizing quantitative and/or qualitative research will be considered.

---

### Guest Editors

Dr. Sarah M. Camhi

Kinesiology Department, University of San Francisco, San Francisco, CA 94117, USA

Dr. Morgan N. Clennin

Institute for Health Research, Kaiser Permanente Colorado, Aurora, CO 80014, USA

---

### Deadline for manuscript submissions

closed (15 February 2022)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
