

Topical Collection

The Organization of Primary Healthcare during the COVID-19 Pandemic

Message from the Collection Editors

This Special Issue will comprise a collection of articles on the results of PRICOV-19, which is the largest study ever carried out in Europe and the most comprehensive study examining how GP practices function during COVID-19. Its results can significantly contribute to better preparedness of primary healthcare (PHC) systems across Europe for future major outbreaks of infectious diseases. Potential topics include but are not limited to the wellbeing of care providers, division of tasks and roles, limitations to the infrastructure or buildings, infection control, patient safety incidents, video consultations, health inequities and care for vulnerable population groups, patient education responsiveness, and healthcare system pandemic response and PHC organization. Keywords

- primary healthcare
- general practice
- quality of care
- patient safety
- equity
- psychosocial
- infectious diseases
- multicountry COVID-19
- PRICOV-19

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
