Artificial Intelligence and the Future of Public and Global Health: Promises, Expectations and Reality

Message from the Guest Editors

We welcome papers in three areas of Artificial Intelligence intersecting with Public/Global Health. 1. Learning and predictive technologies facilitating Public Health sectors' decision making: trends, feasibility studies, practicality, trustworthiness, and expectations; 2. The accuracy of traditional statistic forecasting in time of pandemics and impact of data/software tools on their results; 3. Statistical models versus computational models versus data models: do they affect each other and do we understand the impact of their potential inter-relationship on modeling and predictions in the times of pandemics? Perceptions of pandemics, from governance, political decisions, and healthcare management to cultural and behavioral issues of individuals and societies.

Guest Editors

Dr. Arnold A. Kamis

Dr. Radmila Juric

Prof. Dr. Sang C. Suh

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
