

Special Issue

Public Awareness of Food Products, Preferences and Practices

Message from the Guest Editors

Dear colleagues, Food is not only a source of nutrition for humans, but it also refers to physical and human dynamics. The understanding of food products, preferences, and practices provides knowledge about historical and contemporary uses. In this sense, there is a great variety of actors, cultures, and practices that food value chains include. The consumption of food is one of the key elements of this network. This Special Issue on the 'Public Awareness of Food Products, Preferences and Practices' aims to discuss the protection and promotion of 'food'. The Special Issue welcomes submissions that deal with the development of food awareness in relation to both daily and leisure activities, where travel and cultural differences can also enhance food as tangible and intangible heritage of a territory. The objective of this Special Issue is to publish original and innovative research papers and case studies, from both qualitative and quantitative methodological approaches. Best regards,

Guest Editors

Prof. Dr. F. Xavier Medina

Dr. Francesc Fusté-Forné

Dr. Nela Filimon

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
