

## Special Issue

# Research on Global Health Economics and Policy

### Message from the Guest Editors

This Special Issue presents a compendium of empirical research to inform national, regional, and global health policies focused on addressing health inequality, the financial burden of out-of-pocket payments, and child and maternal mortality in both developing and developed countries. Contributions focusing on applied quantitative and qualitative analyses are particularly encouraged. We also welcome relevant contributions on recent applications of machine learning languages using big data.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
