

Special Issue

Occupational Health and Wellbeing for Healthcare Providers

Message from the Guest Editors

Occupational health and wellbeing are central to the intricate landscape of healthcare, significantly influencing the performance, satisfaction, and overall quality of care provided by healthcare providers. The literature underscores the urgency of addressing occupational stress and burnout among healthcare professionals, emphasizing the need for targeted interventions. Concurrently, investigations into the mental health of healthcare professionals reveal a complex interplay of stressors necessitating comprehensive approaches to support psychological wellbeing. In this Special Issue, we delve into the nuanced dimensions impacting the physical and mental health of healthcare professionals. Navigating the challenges inherent to the healthcare environment, this Special Issue strives to illuminate evidence-based practices, interventions, and innovative strategies enhancing the holistic wellbeing of those dedicated to patient care. By exploring these critical aspects, we aim to offer a nuanced understanding resonating with researchers, practitioners, and experts alike, fostering a healthier and more sustainable work environment for dedicated healthcare providers.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
