

## Special Issue

# Psychosocial Aspects and Quality of Life in Bariatric Surgery: An Update and Directions for Future Research

### Message from the Guest Editors

Bariatric surgery currently represents an effective treatment for patients with obesity, resulting in weight loss and improved physical health. Research has clearly documented a high prevalence of psychiatric comorbidities and a significant impairment in quality of life in bariatric surgery candidates, followed by a general amelioration in the first years after surgery. Research addressing the relationship between BMI, psychopathology, and QoL over time represents an area of interest to inform public health policies, in the light of the extraordinary increase in bariatric interventions and the ongoing debate concerning the extension of current indications to lower BMI classes in the presence of specific conditions (e.g., diabetes). This Special Issue is open to any contribution concerning bariatric surgery psychosocial aspects in the pre- and post-operative period, particularly the determinants of psychopathology and quality of life; the psychosocial and psychopharmacological interventions in the pre- and post-operative period; and research addressing all age groups.

### Guest Editors

Dr. Valentina Martinelli

Department of Brain and Behavioral Sciences, University of Pavia, 27100 Pavia, Italy

Dr. Matteo Alessio Chiappedi

Developmental Psychopathology Research Unit, IRCCS Mondino Foundation, Pavia, Italy

### Deadline for manuscript submissions

closed (7 December 2022)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
