

Special Issue

Quality of Life Challenges in XXI Century

Message from the Guest Editors

The world is changing quickly. This speed is caused by urbanization, technological developments and the increasing demand for energy. However, Health is of highest value: it is an integral part of human development, it is the condition of satisfaction and happiness in life and it helps to fulfil other needs as well. Quality of life is a notion with multiple meanings. It is the effect of a person's attitude to their own physical and mental well-being, material existence, interpersonal relationships, personal development opportunities and sense of subjectivity. Human activity relates to the satisfaction of needs, achievement of goals and fulfilment of dreams with hopes for a better life, a sense of happiness and satisfaction. Satisfaction with life and its conditions are individual and depend on many factors.

This Special Issue intends to provide authors with a platform to contribute their research on the challenges of quality of life in XXI Century.

Guest Editors

Dr. Joanna Rosak-Szyrocka

Dr. Justyna Żywiołek

Dr. Usama Awan

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
