

Special Issue

Urgent Questions to Advance Breast Cancer Research in Environment, Disparities and Primary Prevention

Message from the Guest Editors

This Special Issue reports the results of consensus building among experts and stakeholders recruited to participate in a series of meetings with the purpose of defining what the state of the science is in three overarching areas: environmental exposures, health disparities, and population level prevention interventions. National experts participated in meetings, calls, and literature evaluation to identify priorities for the next steps in each of these areas.

Guest Editors

Prof. Dr. Marion Kavanaugh-Lynch
California Breast Cancer Research Program

Prof. Dr. Deborah J. Bowen
Department of Bioethics and Humanities, University of Washington,

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
