

Special Issue

2nd Edition of Oral Inflammation and Chronic Autoimmune Diseases

Message from the Guest Editor

It is my great pleasure to introduce to you the second edition of the Special Issue of oral symptoms in autoimmune diseases. The causes of autoimmune diseases primarily include disorders in the mechanisms of self-tolerance. Genetic factors play an important role in the development of autoimmune diseases. Environmental factors, such as medications, long-term and repeated stressful situations, and diet, are also of great importance. Interestingly, it is not uncommon for a bacterial or viral infection to be a factor that contributes to the development of autoimmune diseases. Oral tissue conditions can be the first indication of autoimmune diseases, such as type 1 diabetes, psoriasis, rheumatoid inflammation, multiple sclerosis, thyroid diseases, Raynaud syndrome, and Sjogren disease manifestation. Inflammation in oral tissue as a manifestation of chronic infection may influence systemic body conditions. Some additional analyses, such as genetic or immunohistochemical analysis, tissue sample histology or saliva examination, may be useful in the primary diagnosis of these diseases. They may also contribute to the establishment of new oral markers of autoimmune diseases.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
