

## Special Issue

# Recent Advances in Psychopathology in Neurodevelopmental Disorders: From Bench to Bedside

### Message from the Guest Editor

Psychopathology including functional psychiatric disorders such as schizophrenia, bipolar disorder, major depressive disorder and anxiety disorders, and also dementia and challenging behaviour is common in people with neurodevelopmental disorders (NDDs) such as intellectual and developmental disabilities (IDD), autism spectrum disorder (ASD) and attention deficit hyperactivity disorder (ADHD) and is the cause for a major public health concern. Much research has been done in the last three decades to understand this issue and develop effective interventions, but a lot remains unknown for which good quality translational research is urgently needed. In the special issue we would like to draw together research in recent advances addressing these issues. We are inviting original articles, reviews, epidemiological studies, clinically important laboratory-based studies, pharmacological and psychosocial interventions, qualitative studies involving people with IDD and their caregivers, assessment including rating scales, training issues, and quality of life etc. in psychiatric disorders and challenging behaviours in children and adults with IDD, ASD, ADHD or any combination of these NDDs.

### Guest Editor

Prof. Dr. Shoumitro Deb

Department of Brain Sciences, Faculty of Medicine, Imperial College London, Hammersmith Campus, Du Cane Rd., London W12 0NN, UK

### Deadline for manuscript submissions

closed (6 April 2023)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
