

Special Issue

Proceedings of the 2019 Research Centers in Minority Institutions (RCMI) Program National Conference

Message from the Guest Editors

Building on the successes of previous RCMI national and international symposia on health disparities, the 2019 RCMI Program National Conference highlighted the importance of basic, clinical, and population science collaborations to address minority health and health disparities. Hence, the overarching goal of the conference was to advance the science of minority health and health disparities through development and implementation of collaborative solutions to improve minority health and reduce health disparities. We are organizing a Special Issue of the *International Journal of Environmental Research and Public Health (IJERPH)* for the publication of the Proceedings of the 2019 Research Centers in Minority Institutions (RCMI) Program National Conference, which was held on December 15–17, 2019 at the Bethesda Marriott Hotel in Bethesda, Maryland, USA. *IJERPH* is a peer-reviewed scientific journal that publishes articles and communications in the interdisciplinary area of environmental health sciences and public health. For detailed information on the journal, we refer you to <https://www.mdpi.com/journal/ijerph>.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
