

Special Issue

Rehabilitation for People with Neurological Disorders

Message from the Guest Editor

To garner knowledge from diverse perspectives, this special issue seeks research papers on various aspects of rehabilitation of people with neurological disorders. Such papers could include but not limited to: rehabilitation strategies for people with neurological disorders, analysis of tools to assess individuals' impairments associated with their neurological disorders, strategies to enhance the quality of current treatments, and experimental research investigating impairments associated with neurological disorders. We encourage the submission of multidisciplinary work and multi-country collaborative research. We also encourage the submission of new and hot-topic rehabilitation strategies, such as e-health and telehealth modalities for people with neurological disorders.

Guest Editor

Dr. Paulo Henrique Silva Pelicioni

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
