

Special Issue

Potential Risk of Inorganic and Organic Contaminants in Drinking, Surface and Ground Water

Message from the Guest Editor

Publish your research work under the Special Issue of the International Journal of Environmental Research and Public Health (ISSN 1660-4601). This special issue belongs to the section "Environmental Health". This Special Issue solicits research contributions on inorganic and organic contaminants in drinking, surface, and groundwater and the potential risks. To continue this discussion, and to disseminate innovative ideas to our readers and the scientific community, we invite authors to submit manuscripts on **"Potential Risk of Inorganic and Organic Contaminants in Drinking, Surface, and Ground Water"**. **Manuscripts should be received on or before November 31, 2021. Some of the topics of interest in this Special Issue:** Emerging organic contaminants, disinfection byproducts, mercury, heavy metals, odor compounds, arsenic, artificial sweeteners, nutrients and eutrophication, stormwater, septic systems, and water quality. Submitted manuscripts should not have been published previously, nor be under consideration for publication elsewhere (except conference proceedings). Please visit the Instructions for Authors page before submitting a manuscript.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward
