

Special Issue

Research about Risk Perception in the Environmental Health Domain

Message from the Guest Editors

This Special Issue offers an opportunity to publish high-quality interdisciplinary research and reviews on environmental health and risk perception. We welcome manuscripts specifically focusing on the risk perception evaluation of different stakeholders, on the use of risk perception data for decision making, to support governance or to provide information to nourish research design and dissemination, including research developed in the framework of COVID-19 viral infection outbreak. We will also consider articles tackling the issue of risk perception in the framework of political decision-making, and as a tool to reinforce and fine-tune communication campaigns and awareness-raising activities.

Guest Editors

Dr. Liliana Cori

Prof. Dr. Fabrizio Bianchi

Dr. Ennio Cadum

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
