

Special Issue

Innovations in Women's Health Promotion and Healthcare

Message from the Guest Editor

This Special Issue will explore research on innovations in women's health and the promotion of healthcare that aims to improve the quality of women's health. These papers will focus on different aspects of women's health, from preconceptual health through to childbearing and the effects of a healthy lifestyle on women and babies. An additional research topic is outside forces that influence women's health through the leadership and management of health services. This Special Issue is open to researchers publishing innovative work in the field of women's health promotion. This includes the following areas of women's healthcare: Child-bearing teenage pregnancy, preconceptual healthy lifestyle, birth trauma, child and family health, nurses, family violence, leadership and women.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
