

## Special Issue

# Caring for Older Adults: Experiences from the Pandemic with Particular Emphasis on the Situation of Convalescent Post-COVID-19

### Message from the Guest Editors

This Special Issue aims to present scientific evidence related to new challenges concerning caring for older patients from the perspective of the pandemic, focusing on the situation of COVID-19 survivors. Sharing experiences from teams cooperating in the healthcare system to provide the best care and increase the quality of life for the older adults in the light of pandemic experiences and prolonged health effects is a challenge in responding to similar epidemiological crises and other healthcare challenges in the future. We expect manuscripts related to epidemiology, vaccination, clinics, therapy, rehabilitation, and public health problems. We are looking for crucial scientific evidence concerning the impact of access to care on the health outcomes of geriatric patients, the effectiveness and safety of therapy and rehabilitation in the long-term COVID-19 phenomenon in the older adults, nutritional problems, social support and mental health in periods social distancing, the increased risk of depression in conditions of social isolation, problems in professional nursing care, informal care resources, and new challenges in ensuring optimal care in the living environment.

### Guest Editors

Prof. Dr. Barbara Ślusarska

Prof. Dr. Ewa Rudnicka-Drożak

Dr. Grzegorz Józef Nowicki

Dr. Katarzyna Naylor

### Deadline for manuscript submissions

closed (30 June 2023)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
