

Special Issue

Vulnerability and Resilience: A One Health Approach to Environmental and Climate Risks in the Mediterranean

Message from the Guest Editors

In cooperation with the 3rd International One Health Conference, this Special Issue, "Vulnerability and Resilience: A One Health Approach to Environmental and Climate Risks in the Mediterranean", responds to the urgent call for interdisciplinary collaboration in tackling the complex challenges facing the Mediterranean region. Drawing upon the momentum of international One Health conferences, this Special Issue advocates for collaborative efforts across disciplines and sectors. It highlights the imperative of knowledge-sharing, capacity-building, and community empowerment to address the heightened risks posed by climate change and environmental hazards. Through targeted interventions and inclusive approaches, this conference endeavors to pave the way for sustainable development and enhanced well-being in the Mediterranean region and beyond.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
