

Special Issue

Social Networks and Health

Message from the Guest Editors

We would like to invite papers to this Special Issue of the *International Journal of Environmental Research and Public Health*, which will explore the application of Social Network Analysis (SNA) to applied health research. We welcome the submission of theoretical, methodological, empirical, and review papers using a range of social network methodologies and with clear implications for policy. We are particularly interested in research using mixed methods and ego-net analysis. Some of the themes that the papers could address include:

- Health and well-being
- Illness management in everyday life
- Online and offline personal communities
- Changing health behaviours and social practice
- Interactions between healthcare, social care, and community support
- Public policy and enabling environments
- New technologies and changes in healthcare delivery
- Development, implementation and evaluation of interventions

Guest Editors

Dr. Ivaylo Vassilev

Dr. Pilar Marques-Sanchez

Mr. Nestor Serrano-Fuentes

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
