

Special Issue

Youth and Child Development and Health

Message from the Guest Editor

Youth and child development is an important and progressive stage for our young generations in establishing their health and well-being in the long run. In fact, youth and child development involves various and multi-layered dimensions that are susceptible to the influences of family, peers, school, environment, culture, society, political economy, and their intrapersonal traits. Additionally, youth and child health is a pivotal concern as it directly influences the long-term sustainability and healthy development of our societies in the future, which are in fact inseparable from youth and child development. This Special Issue welcomes high-quality contributions addressing the issues related to youth and child development and health; potential topics include, but are not limited to, the following:

- Youth and child development;
- Psychological and physical health;
- Family socialization;
- Societal impacts;
- School environments;
- Peer networks;
- Sociopolitical, economic, and/or cultural influences;
- Intrapersonal traits and characteristics;
- Interpersonal interactions;
- Childhood, adolescence, and adulthood;
- Transitional stages.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
