

## Special Issue

# Biopsychosocial Predictors of Vulnerability, Resilience, and Intervention Responsiveness Among Trauma-Exposed Populations

### Message from the Guest Editor

This Special Issue invites researchers to explore the intricate pathways that contribute to vulnerability, foster resilience, and inform effective interventions. We seek studies that integrate perspectives across disciplines, including, but not limited to, neuroscience, psychology, public health, and sociology, to illuminate how biopsychosocial factors shape health outcomes. Of particular interest are contributions that identify specific stressors/difficulties among trauma-exposed populations, modifiable predictors of resilience, innovative treatment approaches, and measures of psychological and physical well-being. We welcome original research, reviews, and theoretical papers that expand the boundaries of the extant literature.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
