

Special Issue

Safe and Sustainable Food Systems for People, Planet, and Climate

Message from the Guest Editors

The aim of this Special Issue is to collect scientific studies (both original manuscripts and reviews), focusing on the strict link between the food system and human and planet health, including but not limited to those on good food sustainability practices and evidence on educational campaigns, the effectiveness of health policies and their impacts on health, environmental, ethical, social and economic aspects. Special attention will be paid to original research (including meta-analyses). Studies do not necessarily have to offer 'positive results' (i.e., results that confirm previous literature). Rigorous work in which conclusions offer novelties that present exceptions to previous studies is also welcome.

Guest Editors

Dr. Vincenza Gianfredi

Dr. Monica Dinu

Dr. Daniela Martini

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
