Social, Group, and Identity Determinants of Well-Being and Health

Message from the Guest Editors

For decades, research from different disciplines has accumulated data and solid arguments that show an association between social factors and well-being and health. Such social factors include group membership, interpersonal and close relationships, intergroup relations, or social identities, which generate feelings of social integration, and opportunities for cooperation; provide social connectedness and social support networks; facilitate experiences of connection with the world; and reduce feelings of loneliness and isolation. In short, social bonds provide social resources and generate social capital. Today's societies are facing important threats, such as the increase in life expectancy and the progressive aging of the population; the need to face the health, economic, and labor challenges generated by the COVID-19 pandemic; and the need to adopt healthy habits and lifestyles to reduce the risk of chronic, disabling, or fatal diseases.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
