

## Special Issue

# Suicide and Depression in the Elderly

### Message from the Guest Editors

Depression and suicide in the elderly population are not only leading causes of death worldwide, but these issues have also seen significant increases. In the 2018 OECD statistics, the suicide mortality rate among the elderly (over 65) was 18.8 per 100,000 people, and the proportion of older individuals with suicide attempts or suicides was also high. Furthermore, several epidemiological surveys of depression showed that the prevalence of elderly depression was from 15% to 35% among elders (age over 65). As the world is entering into an aging society, it is necessary to prepare for increasing suicide and depression in older adults. The purpose of this Special Issue is to share insights regarding the risk factors, current status, and various policies for preventing depression and suicide in the elderly population. In this Special Issue, interested authors are invited to contribute their research in the field of suicide and depression in the elderly.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
