

## Special Issue

# Suicidal Behavior: Scientific Research to Guide Prevention

### Message from the Guest Editors

Suicidal behavior is a complex phenomenon associated with significant suffering. It is estimated that, each year, more than 700,000 people die by suicide. The WHO proposed the reduction in deaths from suicide as a global goal for 2030. However, the scientific literature has expressed significant concerns about the impact of the COVID-19 pandemic on suicidal behavior. Suicide prevention is challenging and needs to be supported by scientific evidence and innovations with methodological rigor, ethics, and social responsibility. The production and dissemination of knowledge on the prevention of suicidal behavior are important to fill gaps, support clinical practice and strategic interventions, fight against stigma, increase accessibility, inform policies, and propose future research. We are looking for articles that provide a better understanding of issues related to suicide behavior, suicide prevention, and postvention. This can include both original research articles and systematic review papers. All papers in this Special Issue will go through a rigorous review process.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
