

Special Issue

Managing a Sustainable and Low-Carbon Society

Message from the Guest Editors

Modern society faces various global and regional challenges including climate change, poverty, disease, and an aging population. To deal with these challenges, society has to be managed properly to follow a sustainable and low-carbon pathway. This Special Issue welcomes theoretical and empirical studies on issues including, but not limited to: economic analysis of the sustainable energy market, the influence of population dynamics on greenhouse gas emissions, climate mitigation policy analysis, air pollution reduction, sustainable waste treatment, and low-carbon lifestyle analysis.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
