

Special Issue

Eating Behaviors, Dietary Patterns and Nutritional Status in Children, Adults and the Older Generation

Message from the Guest Editors

This Special Issue is aimed at understanding causal factors of eating behaviors and dietary patterns and how they are developed throughout individuals' life, including actions and behaviors guided by thoughts, beliefs, knowledge, values, culture, and environment and how they may be related to the nutritional status of individuals or population groups. Articles addressing the themes: eating behavior, dietary patterns, and nutritional status are invited for this Special Issue, especially those that combine the use of innovative tools in the evaluation of this interface and have an expanded view of nutrition science and nutritional epidemiology.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
