# Prevention and Management of Multimorbidity in Older People

### Message from the Guest Editor

Multimorbidity, usually defined as the presence of two or more chronic health conditions, has emerged as a prominent concern in healthcare and research and is among the most pressing health challenges facing aging populations worldwide. The prevalence of multimorbidity is expected to rise in the near future, with current global rates reaching approximately 37% and exceeding 60% in older people. Older people face specific challenges due to the widespread occurrence and complexity of multimorbidity, including prevalent chronic diseases like diabetes, hypertension, cardiovascular disease, and arthritis. The impact of multimorbidity extends beyond the individuals themselves, affecting their caregivers, healthcare providers, and healthcare systems. Managing multimorbidity becomes a complex task for both the individuals and healthcare providers, requiring a holistic approach that focuses on coordination, comprehensive care, and prioritization of treatment goals to optimize their overall health and well-being.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
