

## Special Issue

# Toxicology and Public Health

### Message from the Guest Editor

The overarching goal of the Toxicology and Public Health section of the *International Journal of Environmental Research and Public Health* is to present the recent advances and new discoveries on the health effects of environmental chemicals. We are especially interested in research that has practical applications in understanding the nature and role played by environmental chemicals in the development of human diseases. Equally important is research on innovative strategies to prevent/reduce and/or eliminate chemical exposures and reduce the burden of diseases. We welcome original research, systematic review, or meta-analysis articles focusing on public health and the toxicological sciences, including clinical, biochemical, mechanistic, industrial, and regulatory toxicology.

### Guest Editor

Prof. Dr. Paul B. Tchounwou

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
