

Special Issue

Tourism, Sustainability, Health and the Environment

Message from the Guest Editors

Covid-19 has directly affected the global economy. Tourism has been one of the sectors most affected by the stage of confinement that the novel coronavirus has inaugurated. The World Tourism Council has estimated a global loss of 75 million jobs and \$2.1 trillion in revenue. Furthermore, the sector may experience a 25% reduction in its business. In this context, the need arises to seek new projects, initiatives, and proposals for the tourism sector that enhance aspects related to health and respect for the environment. This Special Issue aims to reflect on the impact of Covid-19 in the tourism field and on the transformations that this crisis will generate in the world of travel, the culture of travelers, and projects related to the tourism sector.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
