Special Issue

Taste, Eating Behaviours, and Health

Message from the Guest Editors

Taste, nutrition, and human health are closely intertwined. This special issue serves as a platform to encourage scientific debate and to advance research in the areas of taste and health. Papers that explore 1) interactions between taste and diet-related behaviours or health outcomes, or 2) the consequences of chronic disease states on taste are sought for this special issue. Submissions can be original studies or review articles. Examples of potential topics could include but are not limited to:

- Acute effects of taste on human physiology and behaviour
- Long-term health implications of taste changes
- Impact of chronic disease(s) on taste function and perception
- Management of taste changes in chronic disease states
- Taste function and perception across life stages
- Policy recommendations related to taste and population health
- Technologies to enhance taste and flavour of nutrientrich foods
- Advances in taste testing methodology, especially for population health studies
- Keywords: Taste; eating behaviours; diet; population health; chronic disease; food technology; policy; sensory

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation, Richard N. Dixon Research Center, Morgan State University, Baltimore, MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
