

Special Issue

Ethics, Social Responsibility and Quality of Life in Times of Crisis

Message from the Guest Editors

Crises in organizations can have either devastating consequences or provide the opportunity for improving people, communities, and the organizations themselves. However, more often than not, crisis either internal or external to the organization can expose breaches in overall quality of life and have a dramatic impact on issues such as the psychological safety of individuals and the overall health and well-being of communities and organizations. As a result, stakeholders will react, experience, and be impacted in different ways based on how the organization and its leadership considers issues such as overall quality of life, well-being, and psychological safety. This Special Issue invites papers that explore the complex issues of ethics, social responsibility, and the importance of well-being for people and organizations—especially in times of crisis.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
