

Special Issue

Tourism and Wellbeing

Message from the Guest Editor

Tourism and wellbeing have been one of the most important research topics in recent years, particularly in tourism and hospitality literature. While wellbeing is a complex concept, current research in our fields has focused on various topics, including antecedents, consequences, or different types of wellbeing (i.e., eudaimonic and hedonic wellbeing). To further advance our knowledge on wellbeing in tourism and hospitality literature, the current Special Issue would include (but is not limited to) positive psychology in tourism and hospitality fields, mental health, tourist wellbeing, tourism experience and its impact on wellbeing, employee workplace wellbeing, wellness tourism in general, and any topics linked to wellbeing research. The Special Issue welcomes any papers that adopt various quantitative, qualitative, and mixed methodologies.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
