State of Health and Quality of Life of Women

Message from the Guest Editor

The relationship between health status and the quality of life greatly depends on the age group with different aspects through stages of women's lives. Puberty, reproductive age, postmenopausal period, and elderly age, as well as pregnancy and delivery are life events that affect women in a unique way. This special issue especially invite papers on urogynecology and its related topics. Pelvic floor dysfunctions are the reason for many conservative and surgical interventions in females that have a significant impact on physical and social limitations and family and partner relationships. Urinary incontinence, pelvic organ prolapse, fecal incontinence, and sexual dysfunctions are common morbidities that lower female quality of life. Despite knowing the risk factors for pelvic floor disorders, unfortunately, we still have not been able to introduce proper prevention on a wide scale. It is very important to correctly diagnose disorders before starting therapy. Both primary and secondary prophylactic measures to diagnose patients that need intervention will ensure an improved quality of life.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
