

## Special Issue

# New Trends in Work-Related Musculoskeletal Disorders and Health-Related Quality of Life

### Message from the Guest Editor

We welcome any research that can help us understand and control the causes and impact of musculoskeletal disorders on the quality of life. Thus, this Special Issue gives priority to research focused on improving the prevention and assessment of musculoskeletal disorder risks independently of the work environment. These may take into account new working conditions, such as flexible working, teleworking, and new forms of jobs.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
