

## Special Issue

# Urban-Rural Integration and Ecological Environment Change

### Message from the Guest Editors

With the rapid development of industrialization and urbanization, the gap between urban and rural areas has been widening and the ecological environment has been severely damaged. The ecological environment is an important factor restricting urban-rural integration. Only a good ecological environment can provide well-being for urban-rural residents. At the same time, urban-rural development also has an important impact on changes in the ecological environment such as overuse of land, water and air pollution, etc. In the process of urban-rural development, human beings have gradually strengthened their attention to the ecological environment. Therefore, we consider that it is very necessary to carry out research on the urban-rural integrated development, the impact of urban-rural development on the ecological environment, and the assessment and protection of the ecological environment. In the process of promoting urban-rural integration, we must focus on the quality of the ecological environment, and we must protect ecological environment while developing.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
