

Special Issue

Bullying and Cyberbullying Among Youths

Message from the Guest Editor

Bullying and cyberbullying are among the most important social and public health issues worldwide, threatening young people's physical and emotional safety. Bullying can happen anywhere, including online, at school, in the workplace, or at home. It can lead to bodily harm, emotional distress, and deprivation of rights. This Special Issue seeks papers on various subjects, including school bullying, cyberbullying, school violence, peer relationships, teacher–student relation, family cohesion, parenting behaviors, sibling relationships, and risk factors in bullying and cyberbullying among children, adolescents, or young adults. We welcome contributions from across the world.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
