

Special Issue

Second Edition: Application of Bibliometrics in Health Research

Message from the Guest Editor

With advancements in analytical tools and the availability of online citation databases, the number of studies based on bibliometric methodologies has grown at an unprecedented rate. Bibliometrics can be defined as the application of mathematical and statistical methods to publications. It can be used as a supporting tool for tracking the dynamics and evolution of scientific research output, and for decision-making when setting research priorities. This Special Issue aims to present the latest research in the field of bibliometrics. We welcome original studies and reviews of bibliometric analyses on topics related to human health, such as public health, environmental health, digital health, mental health, global health, health behavior, chronic disease, infectious disease, and geriatrics. In addition, methodological aspects of bibliometric research are especially welcome. Possible topics for this Special Issue include but are not limited to the following:

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
