

## Special Issue

# Primary Care Services and Management of Cardiovascular Diseases

### Message from the Guest Editor

Despite advances in diagnostic and therapeutic approaches, cardiovascular diseases still confer a growing global health burden. The current Special Issue will comprise manuscripts considering the management of patients with cardiovascular diseases in primary care as well as new approaches to diagnostics, treatment, and health care management. Special attention will also be given to the current pandemic, which is a current challenge facing the health care system, as clinicians need to be aware of new complications. Herein, researchers are encouraged to submit manuscripts focusing on the outcomes of patients with cardiovascular diseases and/or (rare) complications after COVID-19 infection. Original manuscripts, reviews, case reports, study design papers, and opinions are welcome in this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
