Special Issue

New Research on Environmental Monitoring, Impact and Evaluation

Message from the Guest Editor

This Special Issue of *IJERPH* focuses on cutting-edge environmental assessment, monitoring, analysis, and diagnosis technologies to provide deeper insight into environmental sustainability. Papers regarding these topics are encouraged for this Special Issue, particularly those developing novel and advanced environmental monitoring, impact, and evaluation techniques in service, industry, and agriculture applications. We welcome multiple manuscript types, including original research papers, reviews, case reports, etc. The following are examples of topics in this Special Issue:

- Environmental impact assessment;
- Life-cycle assessment;
- Environmental process monitoring or control;
- Statistical analysis of environmental systems;
- IoT- or Al-based environmental monitoring;
- Advanced monitoring strategies;
- Anomaly/change detection in environmental systems:
- Environmental evaluation applications:
- Barriers and outlooks of environmental monitoring and evaluation:
- Predictions based on environmental time series:
- Fate and transport of pollutants;
- Environmental monitoring applications (including but not limited to air, water, energy, waste, soil, noise, and biodiversity).

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers.

Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation, Richard N. Dixon Research Center, Morgan State University, Baltimore, MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
