

Special Issue

Health Impact of Heavy Metal and Organic Pollution in Marine and Terrestrial Environments

Message from the Guest Editors

Here at IJERPH we look forward to receiving your paper for a forthcoming Special Issue entitled “Health Impact of Heavy Metal and Organic Pollution in the Marine and Terrestrial Environment”. In this Special Issue, we shall answer the following questions:

- What are the interrelations between ecosystem services and human or environmental health in an ecosystem?
- What are the strengths, weaknesses, opportunities and threats involved in methods of dealing with pollution in marine and terrestrial habitats?
- How can we measure, assess, and picture the link between organisms in terms of pyramids of energy, biomass and number and pollutants?
- What is the extent of the bioaccumulation and biomagnification of heavy metal and organic pollutants in consumers and producers upon exposure to toxicants in the environment?

Your paper will undergo a rapid, high-quality peer review by expert reviewers and an international editorial board. We will also ensure global visibility of your article is achieved.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
