

Special Issue

Health Economics and Well-Being of Older Adult in Rural Communities

Message from the Guest Editor

It becomes even more critical as the number of aging adults increases, and those living in rural areas desire to age in place while navigating the disproportionately fewer available resources. This Special Issue of the *International Journal of Environmental Research and Public Health (IJERPH)* focuses on health economics, wellbeing, and health promotion, with special emphasis on rural aging adults. New research papers, reviews, and case reports are welcome to this issue. Papers dealing with new approaches, policies, and theories to inform solutions to issues facing rural aging communities are also welcome. Original research articles published in the journal are full research manuscripts (i.e., quantitative, qualitative, and mixed methods studies), and scientific literature reviews will be considered for publication. Manuscripts reflecting the scholarly quality and methodological rigor emphasizing practical implications for health economics and wellbeing among aging rural adults globally and domestically will be considered for review. Submitted manuscripts should not have been published previously nor be under consideration for publication elsewhere.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
