Intensive Care Interventions for Critical Illnesses

Message from the Guest Editor

A Special Issue on “Intensive Care Interventions for Critical Illnesses” in the *International Journal of Environmental Research and Public Health* is being organized. Intensive care is an extremely complex area, due to the level of complications that patients may experience. The intensive care unit presents important factors that professionals working in this area must be aware of, such as drug interventions, sedation, invasive and non-invasive ventilatory support, and the functional rehabilitation of critically ill patients. We would like to invite those who have experience in this area to send your studies and work to be included in this Special Issue in order to contribute to the spread of knowledge on this topic. We believe that systematic review studies and clinical and observational trials are of paramount importance in order to elucidate and present new solutions or possibilities for action. There are important topics to be highlighted and addressed such as the treatment of sepsis, acute respiratory distress syndrome, invasive and non-invasive mechanical ventilation, weaning, antibiotic therapy, functional diagnosis and rehabilitation.

Guest Editor

Dr. Luiz Alberto Forgiarini-Júnior

Department of Medicine and Physiotherapy, Postgraduate Program in Health and Behavior, Catholic University of Pelotas (UCPEL), Pelotas 96015-560, Brazil

Deadline for manuscript submissions

closed (30 April 2025)

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
