

Special Issue

Justice, Equity, Diversity, Inclusivity and Accessibility in Environmental and Public Health

Message from the Guest Editor

The Special Issue on Justice, Equity, Diversity, Inclusivity and Accessibility (JEDIA) comes at a critical juncture for environmental and public health scholarship. Continuing inequities continue to shape who benefits from environmental resources and who bears the impact of environmental harm. Manuscripts are sought that advance understanding, applications and practice across the full spectrum of JEDIA: from workforce diversity and inclusive research designs to equitable access to green spaces and health-promoting environments, public health, education and health care. The aim is to foster scholarship that is evidence-informed, rigorous and relevant, as well as actionable work that identifies problems and gaps and proposes novel and innovative solutions, engages communities, and informs policy and practice for lasting change. This call is relevant for stakeholders to cutting-edge and ground-breaking discoveries and dismantling barriers in environmental and public health. By prioritizing justice, equity, diversity, inclusivity and accessibility, the Special Issue seeks to catalyze a just, impactful, outcome-oriented and sustainable future for all generations.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
