

Special Issue

Improving Young People's Outcomes through the Lens of Health and Social Science

Message from the Guest Editors

The steady increase in the world's population of young people indicates the need for programs that would maximize their potentials as well as promoting health and wellbeing. Without proper support, we are setting our next generation towards poor health trajectories and social disadvantage. Despite several campaigns and strategies set at international, national, and local levels, interventions and programs need to evolve and utilize the current best available evidence as the adolescent population remains dynamic. This Special Issue aims to understand the protective characteristics and risks of young people, especially from disadvantaged settings, through the health and social science perspective. It also explores stories and learnings from adolescent-responsive interventions, initiatives, and programs which aimed to strengthen and empower young people to make decisions about their health and wellbeing. This issue also encourages papers regarding the impact of COVID-19 on adolescents.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
