

Special Issue

Quality of Life and Well-Being in Later Life

Message from the Guest Editor

This Special Issue on "Quality of Life and Well-Being in Later Life" (QLLL) explores the multidimensional perspectives and aspects of aging. QLLL focuses on factors that influence the well-being of older adults. It presents interdisciplinary research addressing physical, psychological, psychiatric, social, and environmental determinants of quality of life in later years. Topics include health and functional capacity, mental health, social relationships, and other dimorphic factors, as well as access to supportive environments. This Special Issue emphasizes the interplay between individual resilience, psychotherapy, and societal structures, highlighting strategies to promote active aging and minimize disparities. The contributions address diverse populations, providing insights into medical, cultural, economic, and policy-related influences on aging experiences. This Special Issue aims to present interventions and policy recommendations that can enhance the quality of life for aging populations globally.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
