Physical Therapy Across the Continuum of Care: Integrating Health Promotion, Treatment, and Rehabilitation

Message from the Guest Editors

Physical therapy is a core component of comprehensive health care, playing a vital role in areas ranging from health promotion and disease prevention to treatment and rehabilitation. As health systems increasingly emphasize integrative and person-centered models of care, physical therapists are uniquely positioned to contribute across all stages of the continuum. This Special Issue, entitled “Physical Therapy Across the Continuum of Care: Integrating Health Promotion, Treatment, and Rehabilitation”, aims to highlight the breadth and depth of physical therapy practice and research. We welcome studies that explore innovative interventions, collaborative approaches, and evidence-based strategies to enhance function, prevent disability, and improve quality of life. Submissions from diverse fields that intersect with physical therapy, including medicine, public health, and complementary disciplines, are welcomed to foster a holistic understanding of health and recovery.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
