

Special Issue

Digital Health Innovations for Caregivers of People with Chronic Conditions

Message from the Guest Editor

This Special Issue is focused on all types of digital solutions (e.g., smartphone applications, virtual reality, data-driven approaches) that offer learnings on how to support the indispensable caregiver population that supports those with chronic conditions. Some examples of topics that could be covered include:

- Novel/innovative ways of engaging or “co-creating” with caregivers to produce higher-quality digital innovations aimed at improving wellbeing in caregivers;
- Digital innovations designed to support “informal” caregivers to improve overall wellbeing/quality of life, including within the community setting;
- Digital innovations used/tested in the care home/nursing home sector to support professional caregivers’ wellbeing;
- Digital innovations designed for remote monitoring and support;
- Data-driven approaches to understand and support professional and/or informal carers;
- Digital innovations that can help family members and friends of individuals who experience side effects of treatments and/or

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
